Part III DETAILED ACTION

1. This application is a continuation of 08/763,669 which claims benefit of provisional application 60/008,502.

- 2. Claim 4 is pending.
- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 4 stands rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has no support for an antibody that competitively inhibits the binding of the B505 antibody to $hLH\beta$ core fragment.

Applicant argues they have support for an antibody that competitively inhibits the B505 antibody to the $hLH\beta$ core fragment by the disclosure of competitive binding immunoassays between a series of monoclonal antibodies isolated because of their ability to bind the hLHB core fragment with high affinity and specificity. However, the breadth of the claims encompass antibodies outside the scope of antibodies identified by the disclosed immunoassays. One example of such an antibody would be an anti-idiotypic antibody which was made specifically against the B505 antibody. This antiidiotypic antibody would competitively inhibit the binding of the B505 antibody to the hLH\$\beta\$ core fragment by specifically binding to the B505 idiotypic region thereby sterically hindering the ability of the B505 antibody to bind the $hLH\beta$ core fragment. Furthermore, such an antibody would meet the limitations of an antibody which competitively inhibits because increasing concentrations of the anti-Id antibody would increasingly block the ability of the B505 antibody to bind the $hLH\beta$ core fragment. Since Applicant's disclosure does not specifically disclose a genus antibody that competitively inhibits the binding of the B505 antibody to $hLH\beta$ core fragment, and they are relying on what one of skill in the art performing the immunoassays disclosed in the specification would necessarily arrive at, and the breadth of the claim encompasses additional antibodies outside the disclosure of competitive immunoassays, the genus claimed antibodies do not have adequate written disclosure.

Serial Number: 09/404,076

Art Unit: 1644

5. **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is $(703)\ 305-1987$. The examiner can normally be reached on Monday through Thursday from 9:30 am to 4:30 pm.
- 7. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at (703) 305-3973. The FAX number for our group, 1644, is (703) 305-7939. Any inquiry of a general nature relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (703) 308-0196.
